Professional Summary

I am a Systems Technician, a Software Analysis and Development Technologist, and a Software Engineering student. I build complete web applications, from the database and the API to the interface, and in recent months I have worked on my own artificial intelligence and cybersecurity projects that are already in production. I have also worked with data, REST APIs and process automation in business environments. I learn quickly, solve problems and adapt to new challenges. I am looking for an opportunity where I can contribute and keep growing in software development, databases and AI.

Work Experience

AI and Cybersecurity Solutions Developer – Personal projects (independent)
May 2026 – Present | Remote

- I designed and deployed to production full stack artificial intelligence and cybersecurity platforms.
- SecureScan Web: checks the security of a website, calculates a risk score and generates a PDF report with references to OWASP, CWE, CVE and ISO/IEC.
- LexIA Colombia: legal assistant with AI that answers with verifiable citations from Colombian law (RAG and embeddings).
- OBD2 Libre: free, open-source web platform that explains more than 18,000 OBD2 fault codes in plain Spanish, with predictive search and a page for each code (meaning, symptoms, causes and diagnostic steps). Angular, Express and SQLite, deployed on Render.
- Mundo de Rescate: educational block-based programming game with 4 zones and 10 characters to rescue, built with plain HTML, CSS and JavaScript.
- I also built CyberGuard, a cybersecurity platform for Windows with a vulnerability scanner, IDS and SIEM.

Conexiones Digitales BPO S.A.S. – Data Analyst | Full Stack Developer
Mar 2026 – Apr 2026 | Medellín

- I analyzed and optimized real-time operations in a high-volume environment using SQL and Excel.
- I developed a monitoring system for contact center campaigns with a real-time dashboard of operational metrics: call volume, statuses and effectiveness.
- I implemented the full stack application with Angular and Tailwind CSS on the frontend, and Node.js and Express on the backend, with MySQL (Sequelize) and secure JWT authentication.
- I built the REST APIs and the indicator visualizations to support operational decision-making.

Freelance Full Stack Developer – Personal projects (independent)
Aug 2025 – Mar 2026 | Remote

- I independently developed web applications, software and video games, taking each project from analysis to deployment.
- Portfolio Web: my professional portfolio built with Angular and hosted on Firebase.
- Flappy Bird: 2D video game in Unity and C# with physics, collisions and scoring; includes an executable and an APK.
- Flask Web CRUD: technical test for a Frontend position, with users, validations and packaging as an .exe.
- Separatas POS: promotion management for POS systems, with Docker and CI/CD on GitHub Actions.
- Contacts: contact book with Firebase Auth and real-time Firestore.
- Monetary Control (in development): expense and income tracking with Angular, C# and SQL Server.

Somex Nutrición S.A.S. – ICT Apprentice, Projects Area
Feb 2025 – Aug 2025 | Medellín

- Development of an enterprise application for locker inspection using Angular, Node.js and SQL Server.

- Implementation of REST APIs, JWT authentication, role management and storage of digital evidence.
- Process automation using Excel VBA, Power Apps and Power Automate.
- Deployment and support of solutions in production environments with IIS and PM2.
- Optimization of internal processes and improved traceability through technology solutions.

Education

- Corporación Escuela Tecnológica del Oriente – Software Engineering | Bucaramanga, Santander | In progress
- SENA – Centro de Tecnología de la Manufactura Avanzada – Technologist in Software Analysis and Development | Medellín, Antioquia | May 2023 – Aug 2025
- SENA – Centro Industrial y de Energías Alternativas – Systems Technician | Riohacha, La Guajira | Jan 2021 – Dec 2022
- Institución Educativa Eusebio Septimio Mari – High School Diploma | Riohacha, La Guajira | Dec 2022

Additional Training

- SENA – Fundamentals of the Occupational Health and Safety Management System | Riohacha, La Guajira | Apr 2021
- SENA – Entrepreneurial Behavior | Riohacha, La Guajira | Sept 2022
- Udemy – Web Development from Scratch: HTML5, CSS3, JavaScript | Nov 2023
- Udemy – Angular from Zero to Expert: Build a Real Application | Apr 2024
- SENA – English Does Work, levels 1 to 6
- SENA – Web Development with PHP | Girón, Santander | Sept 2026

Technical Skills

- **Frontend:** Angular 16+, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Angular Material, RxJS, Reactive Forms, responsive design
- **Backend:** Node.js, Express (MVC), REST APIs, JWT, Sequelize, Prisma, Multer, CORS, role and permission management, Python (Flask)
- **Databases:** SQL Server, MySQL, PostgreSQL, SQLite, Firestore, MongoDB; stored procedures, temporary tables, SQL optimization, SSMS
- **AI and Cybersecurity:** RAG architecture, embeddings, OWASP, CWE/CVE, ISO/IEC 27001, IDS/SIEM
- **Automation:** Excel (VBA and SQL Server integration), Power Apps, Power Automate
- **Deployment and Tools:** Git, GitHub, GitHub Actions, Docker, Firebase Hosting, Render, Vercel, IIS, PM2, Postman, Figma, VS Code, Visual Studio
- **Currently learning:** English, C#, Unity, microservices, scalable architecture

Project Portfolio

If you would like to know more about my background and see the projects I mention in my experience up and running, I invite you to visit my portfolio: https://juan-cardenas-portafolio.web.app/projects
