

RÉSUMÉ

JUAN GUILLERMO CÁRDENAS MIRANDA

Software Analysis and Development Technologist | Full Stack Developer | Junior Data Analyst | Bello, Antioquia, Colombia

+57 350 594 7967 | juangui.1032@gmail.com | <https://github.com/JuanGuillermo09> | <https://www.linkedin.com/in/juanguillermocardenas/> | <https://juan-cardenas-portafolio.web.app/>

Professional Profile

Systems Technician, Software Analysis and Development Technologist, and Software Engineering student with experience in data analysis and web application development. I have knowledge of SQL, Excel, and Full Stack development using Angular and Node.js for building web applications, REST APIs, and process automation solutions.

I have participated in the development of enterprise systems from the ground up, contributing to information analysis, process optimization, and the implementation of technology solutions aligned with business needs. I am characterized by my learning ability, problem-solving skills, and adaptability to new technological challenges.

I am currently completing my Software Engineering studies and seeking opportunities to continue strengthening my professional experience in software development, databases, information systems, and digital transformation.

Work Experience

Conexiones Digitales BPO S.A.S. – Data Analyst | Full Stack Developer

Mar 2026 – Apr 2026 | Medellín

- Analysis and optimization of real-time operations using SQL and Excel.
- Development of a monitoring system for contact center campaigns with real-time operational metrics.
- Implementation of a Full Stack application using Angular, Node.js, Express, MySQL, and JWT.
- Development of REST APIs and operational dashboards to support decision-making.

Freelance Full Stack Developer

Aug 2025 – Mar 2026 | Remote

- Development of web applications using Angular, C#, SQL, and Firebase.
- Creation of a professional portfolio, management systems, and frontend projects.

- Development of a 2D video game using Unity and C#.
- Management of the complete software development lifecycle: analysis, development, testing, and deployment.
- Use of Git and GitHub for version control.

Somex Nutrición S.A.S. – IT Apprentice, Projects Area

Feb 2025 – Aug 2025 | Medellín

- Development of an enterprise locker inspection application using Angular, Node.js, and SQL Server.
- Implementation of REST APIs, JWT authentication, role management, and digital evidence storage.
- Process automation using Excel VBA, Power Apps, and Power Automate.
- Deployment and support of solutions in production environments using IIS and PM2.
- Optimization of internal processes and improvement of traceability through technology solutions.

Education

Corporación Escuela Tecnológica del Oriente – Software Engineering | Bucaramanga, Santander | Currently Enrolled

SENA – Center for Advanced Manufacturing Technology – Software Analysis and Development Technologist | Medellín, Antioquia | May 2023 – Aug 2025

SENA – Industrial and Alternative Energy Center – Systems Technician | Riohacha, La Guajira | Jan 2021 – Dec 2022

Eusebio Septimio Mari Educational Institution – High School Diploma | Riohacha, La Guajira | Dec 2022

Additional Training

SENA – Fundamentals of Occupational Health and Safety Management Systems | Riohacha, La Guajira | Apr 2021

SENA – Entrepreneurial Behavior | Riohacha, La Guajira | Sep 2022

Udemy – Web Development from Scratch: HTML5, CSS3, JavaScript | Nov 2023

Udemy – Angular from Zero to Expert: Build a Real Application | Apr 2024

SENA – English Does Work – Levels 1 to 6

Technical Skills

- Frontend: Angular, HTML5, CSS3, TypeScript, JavaScript
- Backend: Node.js, Express, REST APIs, JWT, Multer
- Databases: SQL Server, MySQL
- Automation: Excel (VBA and SQL Server Integration)
- Tools & Platforms: Git, GitHub, Firebase, IIS, PM2
- Low-Code: Power Apps, Power Automate

Featured Projects

Real-Time Monitoring System

- Full Stack application for monitoring campaigns and operational metrics in real time.
- Technologies: Angular, Node.js, MySQL, and JWT.

Locker Inspection System

- Enterprise web application for managing inspections, photographic evidence, and digital signatures.
- Technologies: Angular, Node.js, and SQL Server.

Professional Portfolio

- Web application developed to showcase professional experience, skills, and projects.
- Technologies: Angular 20, TypeScript, CSS, and Firebase Hosting.
- Link: <https://juan-cardenas-portafolio.web.app/>

World Pizza Web

- Responsive restaurant website with a modern design and optimized navigation.
- Technologies: HTML, CSS, and JavaScript.
- Link: <https://world-pizza-9b93b.web.app/>

Calculator Web

- Interactive web application for performing mathematical operations through an intuitive and responsive interface.
- Technologies: HTML, CSS, and JavaScript.
- Link: <https://calculadora-7faa5.web.app/>

SIGR – Restaurant Management System

- Web application for managing orders, reservations, digital menus, reports, and users.
- Technologies: Angular 20, TypeScript, Tailwind CSS, and RxJS.
- Link: <https://sigr-gamma.vercel.app/>
