Professional Profile

Technologist in Analysis and Software Development with experience in data analysis and development of web solutions. I currently work as a Data Analyst, combining skills in SQL and Excel with Full Stack development (Angular and Node.js) to create real-time solutions.

I have developed complete systems from scratch in corporate environments, including web applications, REST APIs, and process automation. I stand out for problem solving, continuous learning, and a focus on process optimization through technology.

Work Experience

Conexiones Digitales BPO S.A.S. – Data Analyst | Full Stack Developer

Mar 2026 – Apr 2026 | Medellín

- Real-time operations analysis and optimization in high-volume environments
- Monitoring operational metrics for deviation detection and continuous improvement
- Data processing and management using SQL and Excel for operational analysis
- Development and implementation of a real-time monitoring system for call state control, effectiveness analysis, and operations optimization.
 - Full Stack application with Angular, Node.js, and MySQL
 - REST API development with Express
 - JWT authentication implementation
 - Visualization of operational metrics (calls, states, effectiveness)

Freelance Full Stack Developer

Aug 2025 – Mar 2026 | Remote

- Development of web applications with Angular and deployment on Firebase
- Implementation of client-server solutions (Angular, C#, SQL)
- Development of 2D video game in Unity with C#
- Full project management (analysis, development, testing and deployment)
- Use of Git and GitHub for version control

Somex Nutrition S.A.S. – ICT Apprentice, Projects Area

Feb 2025 – Aug 2025 | Medellín

- Development of web application for locker inspection (Angular, Node.js, SQL Server)
- Implementation of REST API, authentication with JWT and file handling with Multer
- Process automation via Excel (VBA) and integration with SQL Server
- Development of applications in Power Apps and flows in Power Automate
- Deployment in production environment using IIS and PM2

• Achievement:

- Reduction of operational times and improvement in traceability of internal processes

Education

Corporación Escuela Tecnológica del Oriente – Software Engineering | Bucaramanga, Santander | Studying

SENA – Center for Advanced Manufacturing Technology – Technologist in Software Analysis and Development | Medellín, Antioquia | May 2023 – Aug 2025

SENA – Industrial Center and Alternate Energies – Technician in Systems | Riohacha, La Guajira | Jan 2021 – Dec 2022

Institución Educativa Eusebio Septimio Mari – Academic High School | Riohacha, La Guajira | Dec 2022

Supplementary Training

SENA – Fundamentals of the Occupational Health and Safety Management System | Riohacha, La Guajira | Apr 2021

SENA – ENTREPRENEURIAL BEHAVIOR | Riohacha, La Guajira | Sept 2022

Udemy – Web development from scratch: HTML5, CSS3, JavaScript | Nov 2023

Udemy – Angular from beginner to expert: Create a real application | Apr 2024

SENA – ENGLISH DOES WORK – LEVEL 1 TO 6

Technical Skills

- Frontend: Angular, HTML5, CSS3, TypeScript, JavaScript
- Backend: Node.js, Express, REST APIs, JWT, Multer
- Databases: SQL Server, MySQL
- Automation: Excel (VBA and integration with SQL Server)
- Tools: Git, GitHub

Highlighted Projects

Real-Time Monitoring System

- Full Stack Application for campaign monitoring (Angular, Node.js, MySQL, JWT)

Locker Inspection System

- Enterprise web application with digital signatures (Angular, Node.js, SQL Server)
